Projects

Guessing Game / [ReactJS](#), [Tailwind](#), [JavaScript](#) / [Website](#) / [Github](#)

- The aim of this project is to develop an interactive and engaging guessing game using React.js and Tailwind CSS. The game will challenge users to guess a randomly generated number within a specified range, providing feedback on each guess to guide them closer to the correct answer.
- Through this project, I honed my frontend web development skills and delivered a practical solution.

Portfolio Website / [ReactJS](#), [Tailwind](#) / [Website](#) / [Github](#)

- This portfolio showcases my projects, skills, and experiences in a clean and modern design. With smooth animations and responsive layouts, visitors can seamlessly explore my work and get a glimpse of my capabilities.
- Tailwind CSS has allowed me to create a highly pleasing interface, while React's component-based architecture ensures smooth navigation and interaction.

Currency Converter / [ReactJS](#), [Tailwind](#), [Api](#) / [Website](#) / [Github](#)

- The aim of this project is to develop a responsive and user-friendly currency converter website using React.js and Tailwind CSS, which allows users to quickly and accurately convert amounts between different currencies in real-time by fetching current exchange rates from a reliable currency conversion API.
- Currency Conversion API: An external service to fetch real-time exchange rates.
